

Amplification

Power for the aero 40A is provided by a package of integrated electronics that includes a new 2,000 W (4,000 W_{peak}) amplifier, advanced digital signal processing and connectivity for remote system management. The three channel, high efficiency Class D amplifier design is equipped with a switch mode power supply (SMPS) and a comprehensive protection package for both the amplifier as well as the components. Channel one powers the low frequency way, channel two the mid-range with channel three powering the high frequency drivers.

The aero 40A incorporates... processors. Brick wall FL... provide perfect alignment... exceptionally uniform cover... crossover point. Top-of-the... been employed allowing for... dynamics, lower distortion...

Remote monitoring and control... DASnet™, the audio management... powered cabinets and... software offers users instant... system status as well as... parameters of a single cabinet...
